

Flexi Floor Bunding

SpillSmart Flexi Floor Bunding is a durable 'Rollover' bund designed for secondary containment of liquids. Its high density construction will handle busy traffic areas including heavy vehicles when access is required.

This bunding solution is easily installed and popular for its flexible ability's when concrete ground surfaces are broken or uneven. An adhesive combined with countersunk masonry fitting bolts ensure this durable and versatile bund will stand up over time, creating a watertight banded area suitable for many scenarios.

Designed for:

- Containment of liquids on hardstand surfaces
- A flexible Drive Over Floor Bunding solution
- Vehicle Access including heavy vehicles
- Bunding pallet racking
- Workshops
- Oil and fuel storage and dispensing areas
- Wash bays

Features:

- High density Heavy Duty Construction
- Easy DIY installation
- Customisable for site specific requirements
- Flexible – can be applied to uneven hardstand surfaces
